

GRANDFATHERING NOTE:

In accordance with Section 16-303(d) of LFUCG's Code of Ordinances, a permanent allocation of sewer capacity has been provided for each preliminary subdivision plan, final development plan, final plat, or authorized plan amendment that was approved and certified by the Urban County Planning Commission before July 3, 2013.

Such grandfathered developments do not need to complete a Sewer Capacity Application and are exempt from Capacity Assurance Program (CAP) fees.

You can verify if a property lies within a grandfathered development by locating the subject property on the map. Blue polygons denote grandfathered development. The grandfathered capacity amount can be verified by clicking on the applicable blue polygon. Additionally, any property located within Expansion Area 2A, 2B, or 2C has been grandfathered.

If you have any questions or are uncertain if a property has been grandfathered, please visit the Tap Desk at 125 Lisle Industrial Avenue, Suite 180 or contact them at (859) 258-3433.
